Installation

To install this project, follow these steps:

1. Clone the repository to your local machine using `git clone https://github.com/yourusername/your-repository.git`.
2. Navigate to the project directory using `cd your-repository`.
3. Run the command `npm install` to install the necessary dependencies.

Usage

To use this project, follow these steps:

1. Navigate to the project directory using `cd your-repository`.
2. Run the command `npm start` to start the project.
3. Open a web browser and go to `http://localhost:3000` to view the project.

Contributing

Contributions to this project are welcome! To contribute, follow these steps:

1. Fork the repository to your own Github account.
2. Create a new branch from the `main` branch with a descriptive name using `git checkout -b your-branch-name`.
3. Make changes to the code on your branch.
4. Commit your changes using `git commit -m "Your commit message here"`.
5. Push your changes to your branch using `git push origin your-branch-name`.
6. Create a pull request to merge your changes back into the `main` branch.

License

This project is licensed under the [insert license type here] license. See the [LICENSE.md](#) file for details.
